

A wide-angle photograph of a rural landscape. In the foreground, there's a field of tall, green grass. A single, large, leafy tree stands prominently in the center of the frame. The background features a dense line of trees and a vast, cloudy sky with soft, warm light filtering through the clouds.

‘House of agroecology’ & Delhaize

Frans Muller at COP26

COP26 was the most important climate summit in years. Many believed it to be the world's best last chance to get runaway climate change under control. The summit was set on the global stage and Frans was part of the session on Net Zero for Consumer Goods and Retail.

During the panel, Frans called for more active support to farmers making the green transition, standardizing healthy and environmental product information for consumers, pre-competitive collaboration and government regulation.

"The biggest opportunity is to support the agricultural sector. I see it as our job to partner with them in this transition by incentivizing sustainable change. Farmers need support from the larger firms in this industry. It's simply not enough to ask them to change. It's our job to help them and to support them. Collectively we need to make more investments in sustainable agriculture. For example with longer term contracts and with co-create environmental requirements. At the same time we work together on soil health, bio-diversity and low carbon solutions. This is easier with local suppliers. That's why we are increasing sourcing locally.

I firmly believe that actively engaging with our suppliers across the chain is important.

So far we have communicated with 200 suppliers in our supply chain to ask them to share their data. I think fact-based data is important. With these numbers we can create a baseline and track performance to create new innovative solutions to reduce emissions. It's time for action but it's also time for measurement and accountability."

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

The Lion's Footprint

Met ons actieplan The Lion's Footprint zetten we ons in voor het klimaat.
We lanceren verschillende initiatieven om onze ecologische voetafdruk te verkleinen.

"Delhaize helps customers towards making planet-friendly choices as a result of actions in three areas: the reduction of plastic usage, limiting food waste, the reducing carbon emissions to protect and restore our planet."

BELhaize: “van bij ons”

Delhaize wordt Belhaize

Erkenning voor de 1600 Belgische leveranciers

Vraag naar Belgische producten met meer dan 15 % gestegen in 2020

Brussel - Delhaize heeft altijd al ingezet op de Belgische herkomst van haar assortiment. En de klant zelf is meer en meer bewust op zoek naar producten van Belgische origine. Maar sinds het begin van de gezondheidscrisis is de populariteit ervan nog nooit zo hoog geweest. Zo merkt Delhaize dat de vraag naar Belgische producten in 2020 met meer dan 15 % is gestegen. Een duidelijk signaal. Delhaize trekt dus resoluut de kaart van de Belgische producten. Maar liefst 70 % van het assortiment in een Delhaizewinkel is van Belgische origine. En dat wordt geapprecieerd door de klant. Daarom bedankt Delhaize haar 1600 Belgische leveranciers en verandert ze voor 1 maand van naam : Delhaize wordt Belhaize.

Delhaize tovert haar parkings om tot een BELhaize lokale markt

Brussel – De Belgische herkomst van ons assortiment is bij Delhaize één van de topprioriteiten. En klanten gaan ook meer en meer bewust op zoek naar producten van Belgische origine. Daarom lanceert Delhaize een nieuw concept: Belhaize Lokale Markt waar je kan kennismaken met een selectie van de 1.600 lokale producenten waar Delhaize mee samenwerkt. Tijdens de maanden april, mei, juni en juli toveren we op verschillende momenten 20 parkings van onze supermarkten om tot lokale markten. De Belgische producenten en boeren komen er hun producten voorstellen, maar nog belangrijker: je kan er ook vanalles proeven.

Lokaal met een extra dimensie: duurzaam

BIO-DIVERSITY

HEALTHY SOILS

CARBON /
Climate Change

WATER

LESS WASTE

Agro-ecological practices: soil health

Nurture and protect soil

Soil cover

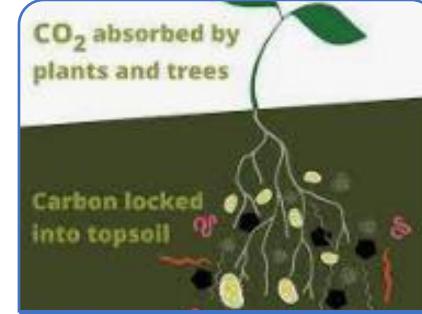

Less trucks & less erosion

Reduced tillage

Increase soil organic matter

Carbon

Less nitrogen

Fertilization

Less chemicals

Plant protection

More life in soil and above

Biodiversity

More trees

Agroforestry

Learnings

- Simple tool
 - Create adjusted criteria
 - Different tool in different industry
 - Little data collection
 - Use technology
- Simple messages
 - Delhaize is one of many
 - Align with others
 - Without exclusivity, benefits are shared
- Credible
 - Need scientific endorsement
 - Clear-cut topics where we bring a change
 - Different topic in different production type
- Scalable
 - Farmer guidance
 - Network needed

Collaborate – If you want to go far, go together

Belgian Alliance for Climate Action (BACA)

Create momentum in Belgium

- The Shift and WWF launched a new Belgian Alliance for Climate Action, endorsed by the Science Based Targets Initiative

The Shift, together with WWF, is **calling upon leading organisations in Belgium** to come together in further developing their sustainability agenda through Science Based targets and to incentivize their supply chains to act accordingly.

- Our CEO signed the Pledge. Our adherence was made public at the official launch on October 12th, 2020
->50 signatories @ launch (incl Aldi, Carrefour, Colruyt & Lidl)
- Delhaize was participating member of the founding workgroup together with Accenture. Now we act as mentor.

Belgian Banana Living Wage Commitment

"We, as a coalition of Belgian retailers, will strive to close the living wage gap by the end of 2027 for our banana volumes sold on the Belgian market."

Sustainability Initiative Fruit and Vegetables

SIFAV is a global initiative to promote sustainable fresh fruit and vegetable supply chains for the European market.

Why House of Agro-ecology?

WAY TO COLLABORATE

- Need for Belgium framework
- Provide expertise and training
- Scientific endorsement
- Create a network along the supply chain
- Create a farmer platform to exchange ideas and experiences
- Get the sector in motion to make it scalable
- Advocacy for funding
